

# **Our Services**

## **Work-Related Injuries**

Work-related injuries are always unexpected. Once approved, Worker's Compensation Board covers Physiotherapy treatment for work-related injuries. Our Physiotherapists will work as a team with your Physician, other health professionals, your Employer, and Worker's Compensation Board. You may or may not be off of work due to your injury. Either way, our goal is to help you heal, rehabilitate and return to work full work duties safely and as quickly as possible.

We will make recommendations to your Employer about a safe return to work after injury and assess the physical skills required for you to complete your duties and not risk re-injury during the healing process.

We are experienced in handling work conditioning programs and will organize a graduated return to the workplace if needed.
